

Interactive Great Barrier Reef Talk

REEF TEACH is an independently run Great Barrier Reef (GBR) research and education organisation. Reef Teach's core goal is to increase everyone's understand of the GBR. It is a well-documented fact that understanding is the strongest and longest lasting tool we have to generate positive call to action for our natural world.

The two hour presentation is aimed at all interested or just curious about the GBR whether school or university students or all other members of the public. This talk is specifically designed, through decades of experience, to give visitor the key knowledge to understand more, see more, and thus dramatically enhance their GBR experience. It is through this enhanced experience that visitors will see how special the GBR is and so, in their own personal way, look after it. We look after things we like – it is as simple as that.

The Reef Teach team are highly qualified marine biologists, not “marine naturalists” (all have post graduate degrees) that have a combine 50 years of experience in the marine biology field.

The presentation is delivered by our marine biologist using a large screen with hundreds of high-quality images, video clips and real specimens. The biologist introduces the audience to a wide range of marine critters they have a good chance of seeing (no sighting is guaranteed). But where the talk truly highlights how special the GBR is, is through us sharing parts of the creature's background stories. This often leaves the audience in disbelief – the reef is a truly magical and strange place. Through this information, the audience will also be given help hints on how to get the most out of their experience. We also believe it is critical to discuss the conservation issues facing the GBR and certain key species, however this is not the core topic, we include this to serve as a reminder of what this one-of-a kind ecosystem is facing.

What we strongly encourage is questions. We have set information we know will enhance a reef experience, but we love questions. This way, the talk is interactive and increases the level of understanding. Please note that with online talks we find it works best to have questions at the end, but if you come for a private in person presentation feel free to ask questions at any time during the talk. Additionally, we use a good dose of humour and storytelling (not lecturing) to make your time with us enjoyable (see Trip Advisor and Facebook reviews).

We are open again after the COVID-19 shutdowns. We are excepting group booking for private talks. We are also able to deliver a 1 hour talk online via Zoom platform. Please enquire about availability and pricing.

One can also feel encouraged that by signing up for this presentation, you are directly contributing to GBR research and education, as proportions of the entrance fee go directly to funding our research projects.
